1. MP-5000 TRANSFER APPLICATION

At <https://www.list-magnetik.com/software> you can obtain the free of charge application **MP-5000 TRANSFER** to transfer data from your MP-5000 device to a Windows PC or laptop.

With MP-5000 TRANSFER you can measure online, you can print the results or transfer them to various applications like Microsoft Word or Microsoft Excel.

The stability of the Bluetooth connection is better the closer you hold the device to the PC or Bluetooth dongle.

If you have connection problems, please shorten the distance to 30 cm.

2. PREPARING CONNECTION

DETECTING THE COM-PORT FOR CABLE

After plugging in the USB cable into MP-5000 and PC, a so-called COM port is formed. This assignment remains permanent. Before starting the application MP-5000 TRANSFER you need to know what this port is called.

3. INSTALLING THE APPLICATION

The installation package is called „MP-5000 TRANSFER_Vxx_Setup.exe“ (xx = version number) and available for download at **<https://www.list-magnetik.com/software>**

If your firewall or virus scanner prevents or disallows an installation, you can ignore these warnings. The installation packages are free from viruses and advertisements, they are only distributed via our homepage.

The default paths used during installation are Windows 10

C:\Program Files (x86)\List-Magnetik\MP-5000 TRANSFER

Constant program components

C:\ProgramData\List-Magnetik\MP-5000 TRANSFER

C:\Users\<>\AppData\Local\VirtualStore\ProgramData\List-Magnetik\MP-5000 TRANSFER

User-used and modified configuration data (COM port, language, limits, project data) and this manual

C:\Users\<>\AppData\Local\List-Magnetik\MP-5000 TRANSFER

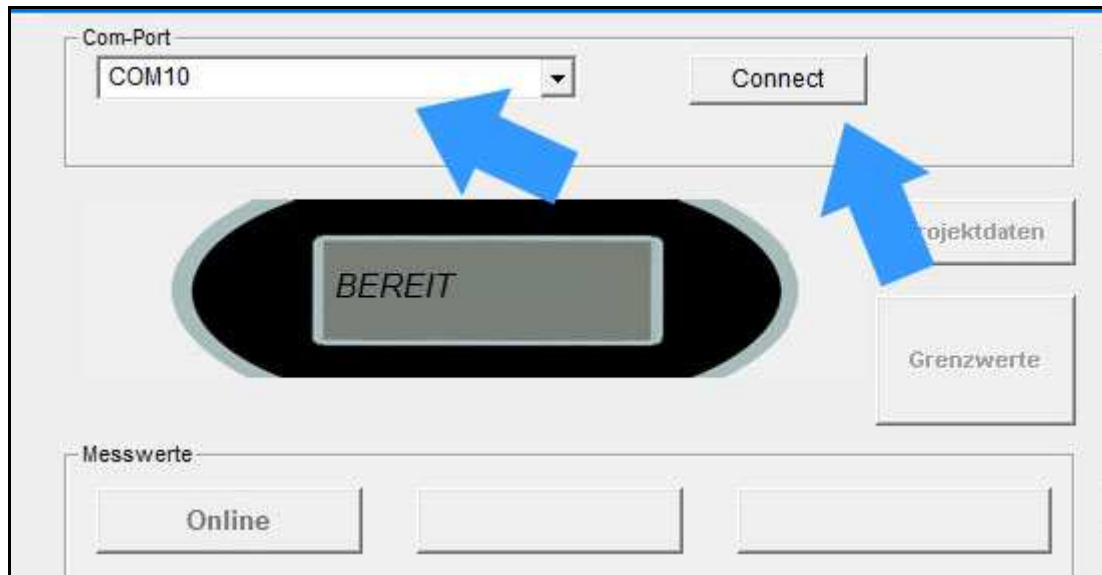

User created measurement series

Specification of the label of the project data

4. FUNCTIONS

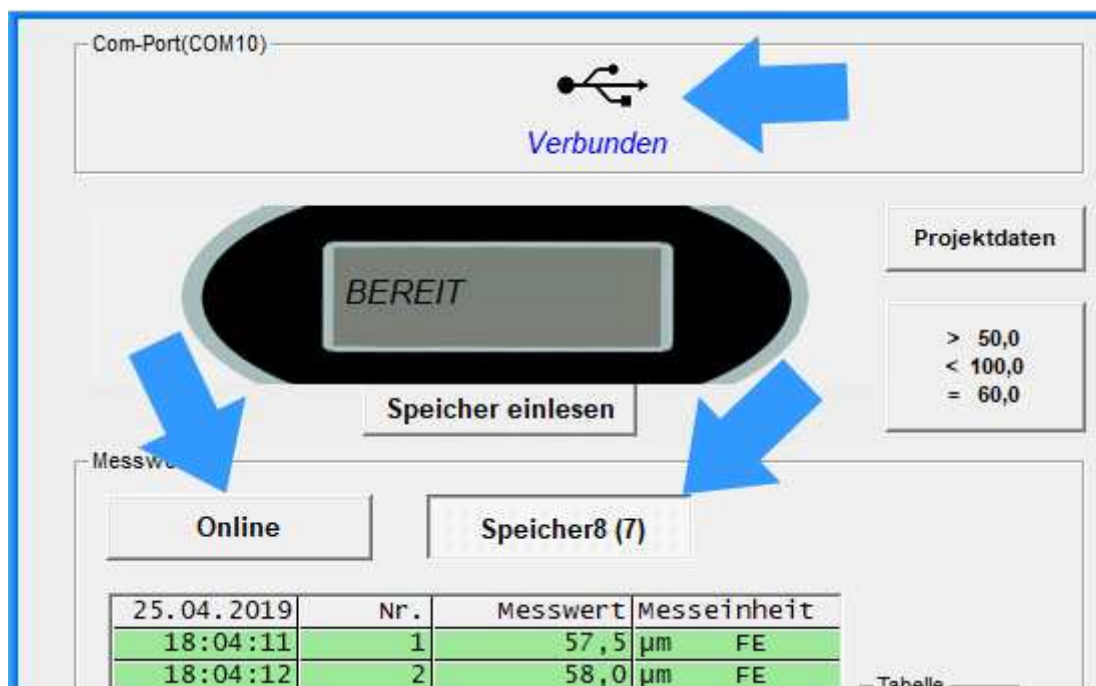

STEP 1: CONNECT

To connect, you need the number of the COM port, which you have determined in point 2. Your MP-5000 must be switched on.

After successful connection, the name changes to "Connected" and the selection box for the COM port becomes invisible. The selected and connected COM port is now in the frame above.

The button above the table is shown as "Online".

MEASURING ONLINE

Now you can start your work.

For example, you can directly perform online measurements.

To do this, click on the "Online" button on the left above the measured value table.

The screenshot shows the 'TOP-CHECK TRANSFER V3.0' software interface. At the top left, there is a menu with 'Datei', 'Sprache', and 'Hilfe'. The main area is divided into several sections:

- Com-Port(COM8):** Shows a Bluetooth icon and the status 'Verbunden'.
- Projektdaten:** A button to view project data.
- Grenzwerte:** A button to view limit values.
- Messwerte:** A section with three tabs: 'Online (4)', 'FE-Speicher (8)', and 'NFE-Speicher (4)'. The 'Online (4)' tab is active, displaying a table of measurements.
- List-Magnetik GmbH:** A section with a 'Chart' button and a 'Statistik:' box showing summary statistics.
- Befehle:** A section with buttons for 'Datei öffnen', 'In Datei speichern', 'Drucken', 'Programmende', and 'Daten kopieren nach' (Clipboard, MS Word, MS Excel).

The 'Messwerte' table contains the following data:

03. 04. 2019	Nr.	Messwert	Messeinheit
09:11:00	1	58,1	µm Fe
09:11:04	2	57,8	µm Fe
09:11:07	3	52,9	µm Fe
09:11:10	4	53,9	µm Fe

The 'Statistik:' box shows the following data:

ONLINE	
Statistik:	
Anzahl	4
Minimum	52,90 µm
Maximum	58,10 µm
Mittelwert	55,68 µm
Std. Abweichung	2,66 µm

The online measurement permanently receives data from the device. Use the Start / Stop button on the bottom right, to interrupt the transfer, in order to limit the number of values. Likewise, you can start the transfer again.

Statistical values are automatically generated from the second measurement: Minimum, Maximum, Average (Mean) and Standard Deviation.

Note: The Standard Deviation is calculated with (n-1).

To toggle between the numeric statistic and a line diagram, please use the button **Chart** and **Stat**.

You can also switch to a larger view in the chart display with the button **<=>**. There, the representation can be selected as a line or bar chart.

Absolute values or observance of the sign

For measurements of magnetic field strength, the value may be positive (north pole) or negative (south pole), depending on the location of the probe or the magnet. For many applications, the polarity is irrelevant, only the absolute value is considered. Therefore, for the measurement with a magnetic field meter, the statistical evaluation is preset to "absolute". You can toggle between the two viewing modes using the \pm button on the right above the statistics. When coloring the measured values due to the limits, and when transferring the data to Excel, this current setting \pm is taken into account.

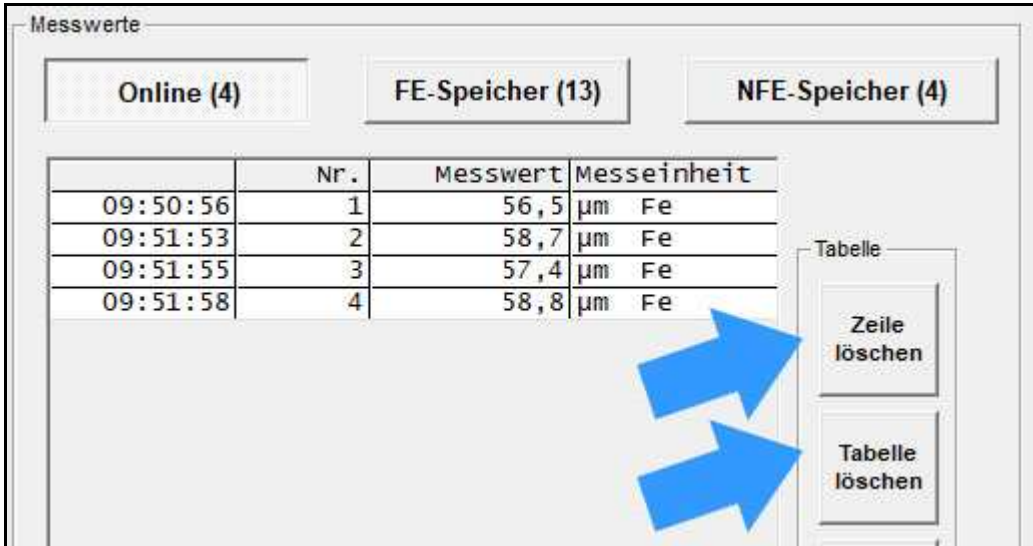

DELETE TAB, DELETE ROWS

The table of measured values can either be completely deleted or individual lines can be displayed. The statistics will be automatically corrected afterwards.

Note:

The data in the device will not be deleted.

By reading again from the device, the deleted values are added again.

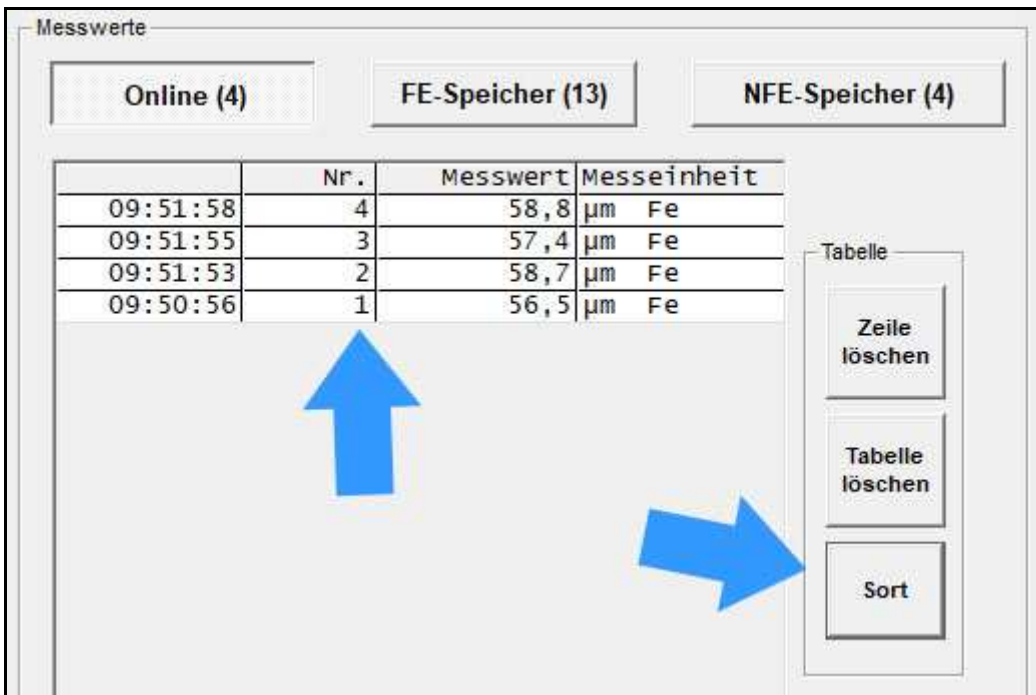

The screenshot shows the 'Messwerte' interface with three tabs: 'Online (4)', 'FE-Speicher (13)', and 'NFE-Speicher (4)'. The 'Online (4)' tab is active, displaying a table with the following data:

	Nr.	Messwert	Messeinheit
09:50:56	1	56,5	µm Fe
09:51:53	2	58,7	µm Fe
09:51:55	3	57,4	µm Fe
09:51:58	4	58,8	µm Fe

To the right of the table is a 'Tabelle' panel containing two buttons: 'Zeile löschen' and 'Tabelle löschen'. Two blue arrows point from the table area towards these buttons.

SORT TABLE

The tables with the measured values can be sorted in descending order from the last to the first one.

The screenshot shows the 'Messwerte' interface with the same three tabs. The 'Online (4)' tab is active, and the table is now sorted in descending order of measurement value:

	Nr.	Messwert	Messeinheit
09:51:58	4	58,8	µm Fe
09:51:55	3	57,4	µm Fe
09:51:53	2	58,7	µm Fe
09:50:56	1	56,5	µm Fe

The 'Tabelle' panel now includes a third button, 'Sort', in addition to 'Zeile löschen' and 'Tabelle löschen'. A blue arrow points to the 'Sort' button, and another blue arrow points to the 'Tabelle' panel.

PROJECT DATA

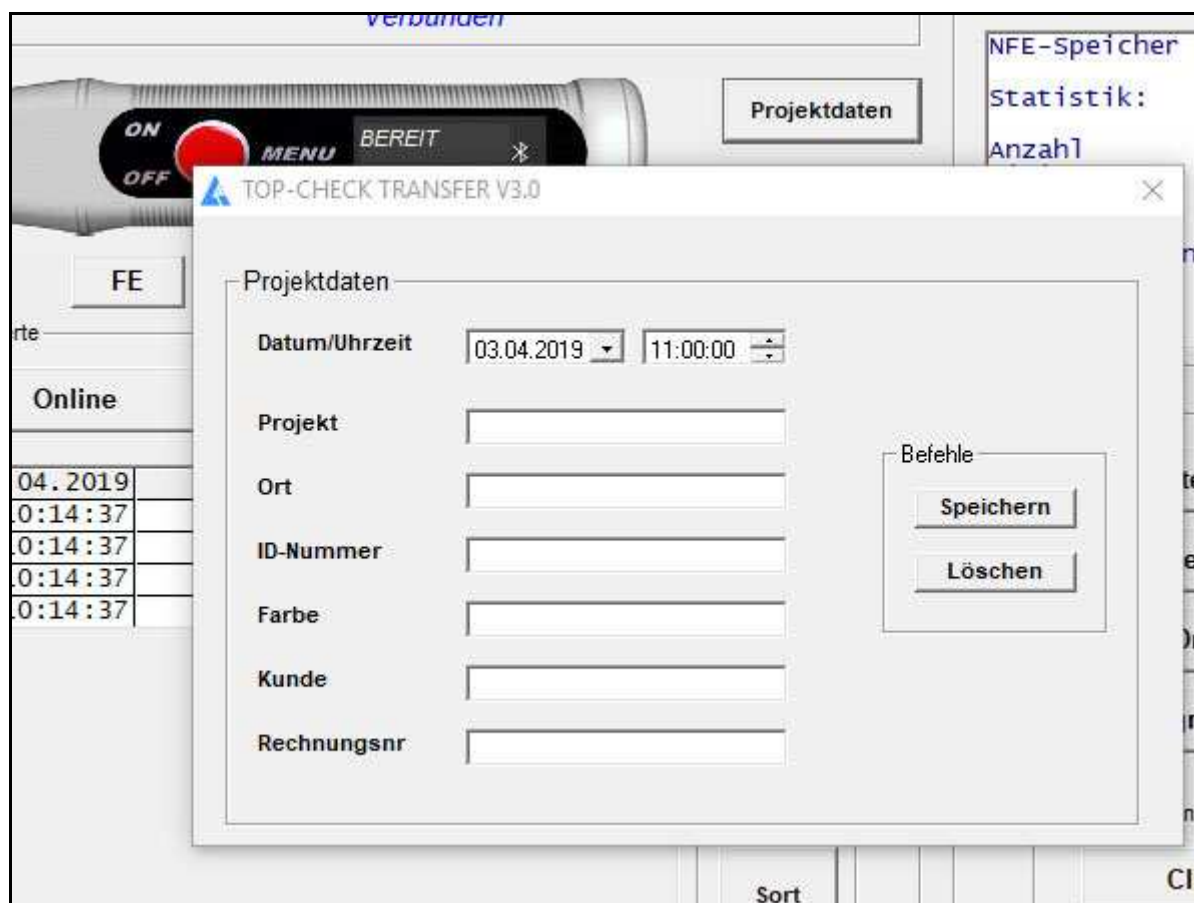

MP-5000 TRANSFER allows you to edit project data for a measurement series. This project data will then be provided during printing, when transferring to Microsoft Word or Microsoft Excel, so that you can document the series of measurements.

You have a date / time information and 6 free text fields as project data available.

The free text fields can be defined by the user. In the configuration file "Projekt.ini" on the user data directory („C:\Users\\AppData\Local>List-Magnetik\MP-5000 TRANSFER"), you can define 6 fixed terms in German and English for yourself.

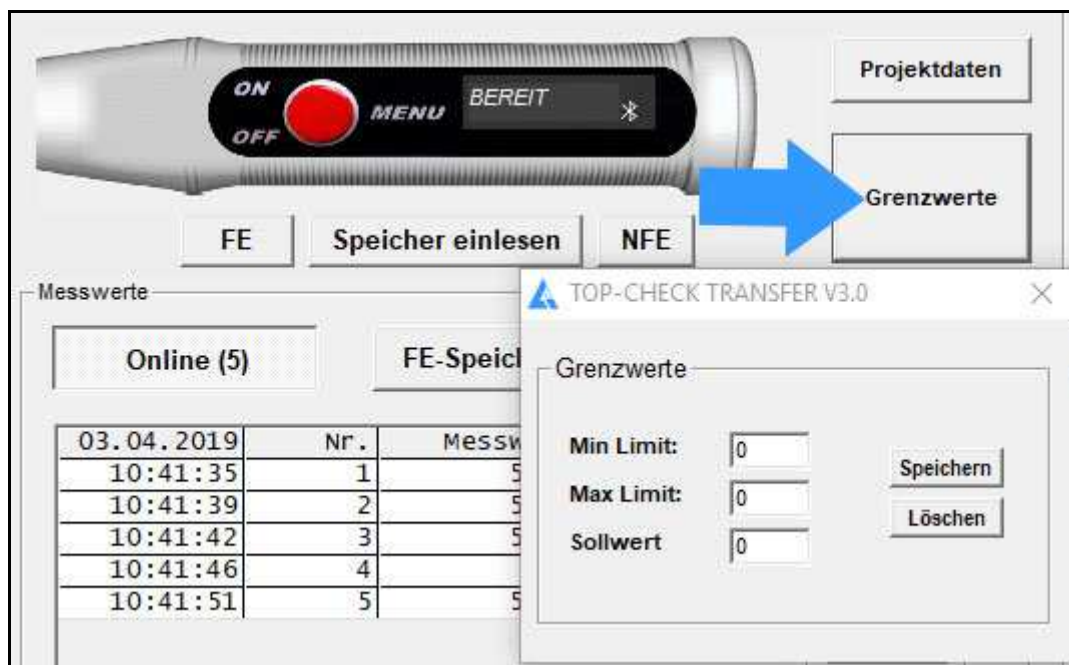

Example:

```
Projekt;Project;  
Ort;Location;  
ID-Nummer;ID No.;  
Farbe;Color;  
Kunde;Customer;  
Rechnungsnr;Invoice No.;
```

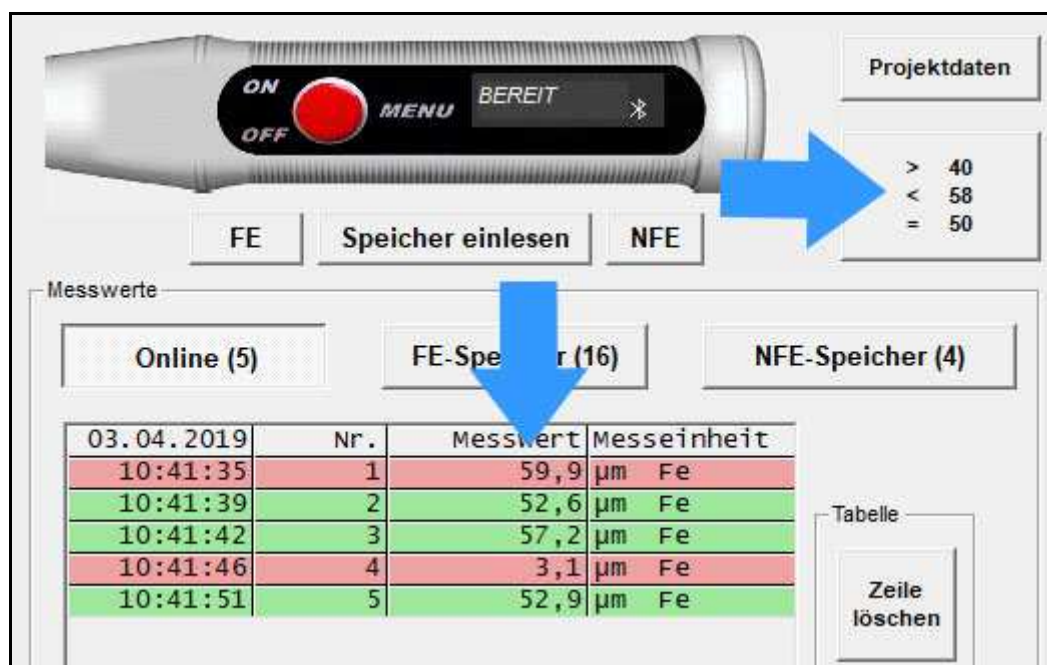

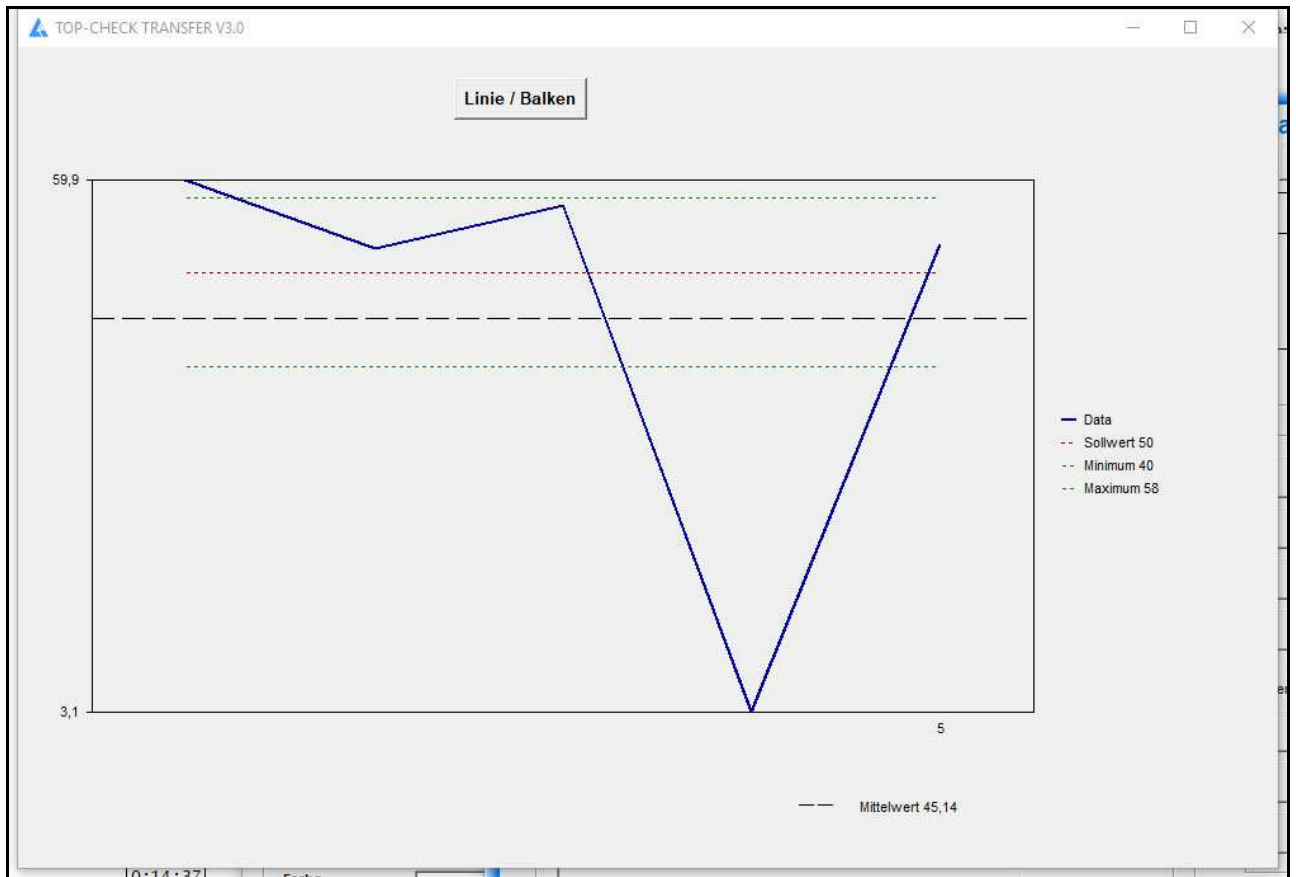

LIMITS

With limit values, an evaluation of your measured values after falling below or above a corridor is possible. If you have specified limit values, the measured values are highlighted in green (= in the corridor) or red (= outside). In addition, a target can be preset. The limits and the target are displayed in the charts (line or bar).

Example: Input of min limit = 40, max limit = 58.

Representation of the limits and the target in the line chart

Absolute values or observance of the sign when measuring the magnetic field

When coloring the measured values based on the limits, the current setting +/- is taken into account.

OUTPUT: FILE, PRINTER, APPLICATIONS

The measurement series can be stored in a file.
Files of type ".mes" are readable with a text editor.

With the button "Open Data File" such a series of measurements can be read again from file, for example to print it or to transfer to Excel.

FE-Speicher		
Statistik:		
Anzahl		33
Maximum	5220,00	μm
Minimum	85,90	μm
Mittelwert	2928,62	μm
Std. Abweichung	2025,07	μm
09.04.2018		
Nr.	Messwert	
17:17:54	1	302,0 μm
17:17:54	2	302,0 μm
17:17:54	3	303,0 μm
17:17:54	4	302,0 μm
17:17:54	5	301,0 μm
17:17:54	6	87,4 μm
17:17:54	7	85,9 μm
17:17:54	8	4230,0 μm
17:17:54	9	4420,0 μm
17:17:54	10	4740,0 μm

Example of a print output via button **Print**

Via Clipboard you can hand over the measuring series to subsequent applications.

The Buttons **MS Word** and **MS Excel** only will work if the named Microsoft Office components are installed, but not with Open Office.

When transferring to Excel, you have the choice of outputting the data as a table or, in addition, graphically as a chart.

Absolute values or observance of the sign when measuring the magnetic field

When transferring the data to Excel, the current +/- setting is taken into account.

OPEN DATA FILE

With then "Open Data File" button you can read in a saved data file again.

LANGUAGE AND HELP

The language can be switched between German and English in the upper menu bar.

In the Help menu, the manual can be opened in PDF format.

Under "Info" your device data (type, firmware version, MAC address) are visible.
